

Cyclistic Bike-share:

Pedaling progress since 2016

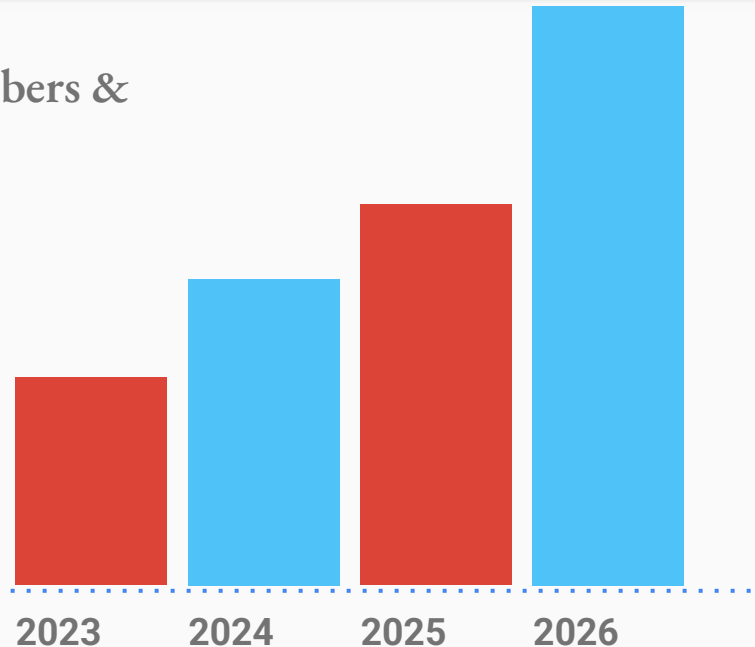

The problem

Differentiate between cycling behaviours of members & casual riders.

Finding ways to convert casual riders into annual members.

Designing marketing strategies catering both of riders.

Trends over the past 12 months (weather-wise)

November 2025

Slump in demand (cold weather)

February 2026

Rise in Cyclistic services (Spring starts)

May Jun Jul Aug Sept Oct Nov Dec Jan Feb Mar Apr

August 2025

Peak demand in cyclistic services

December 2025

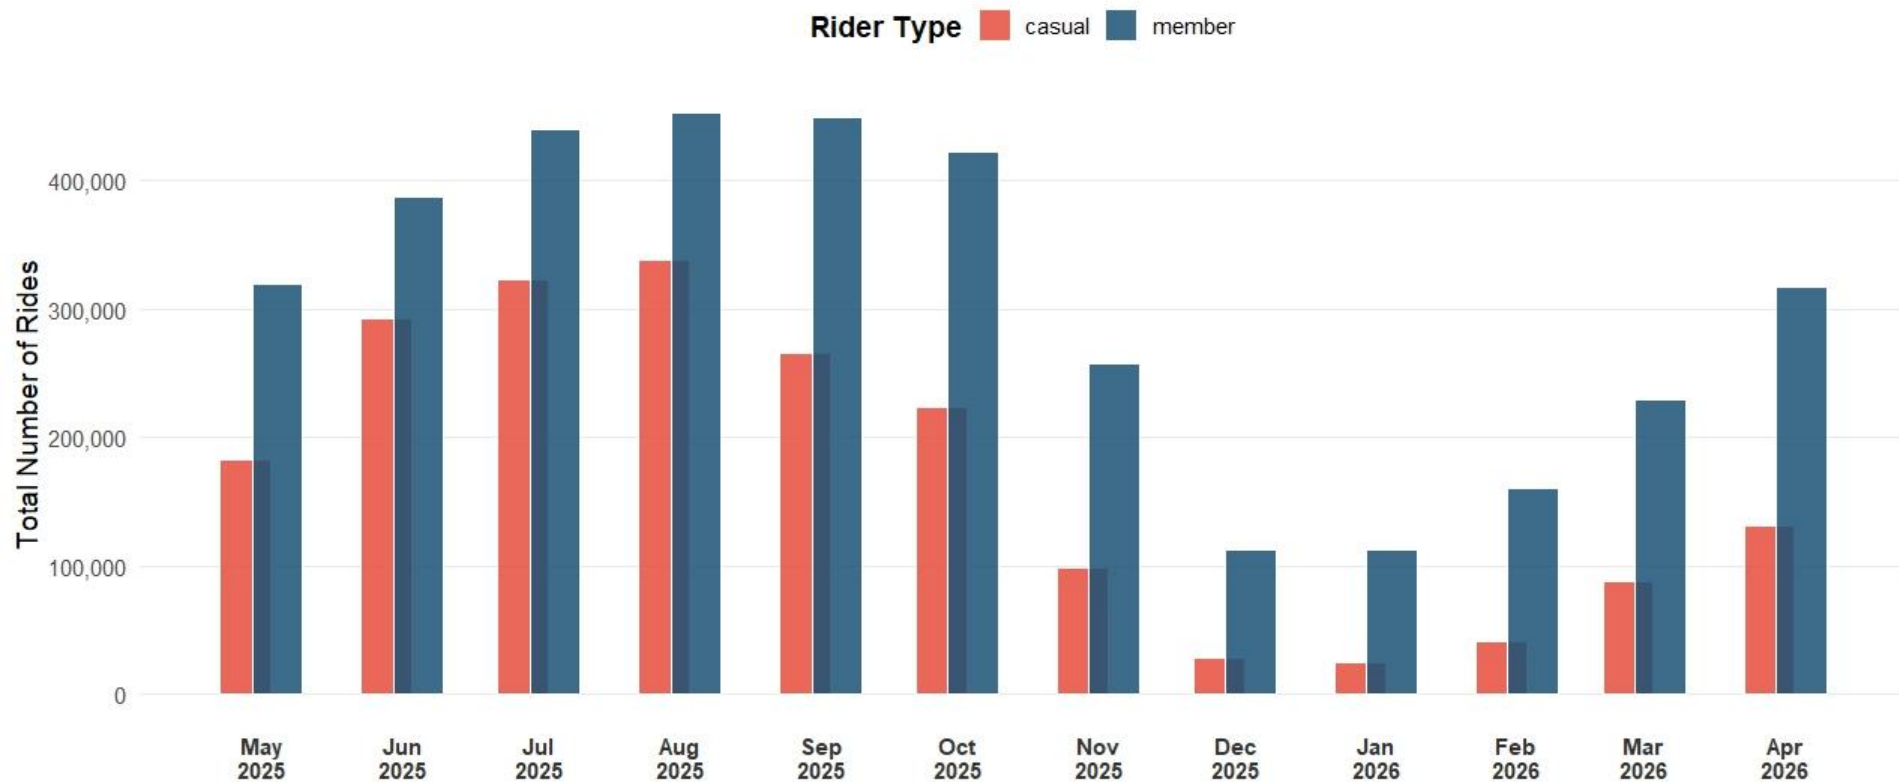

Least demand for cyclistic services

Riding Trends May 2025 to April 2026

Monthly Ridership: May 2025 – April 2026

Staggered overlap comparing Annual Members vs. Casual Riders

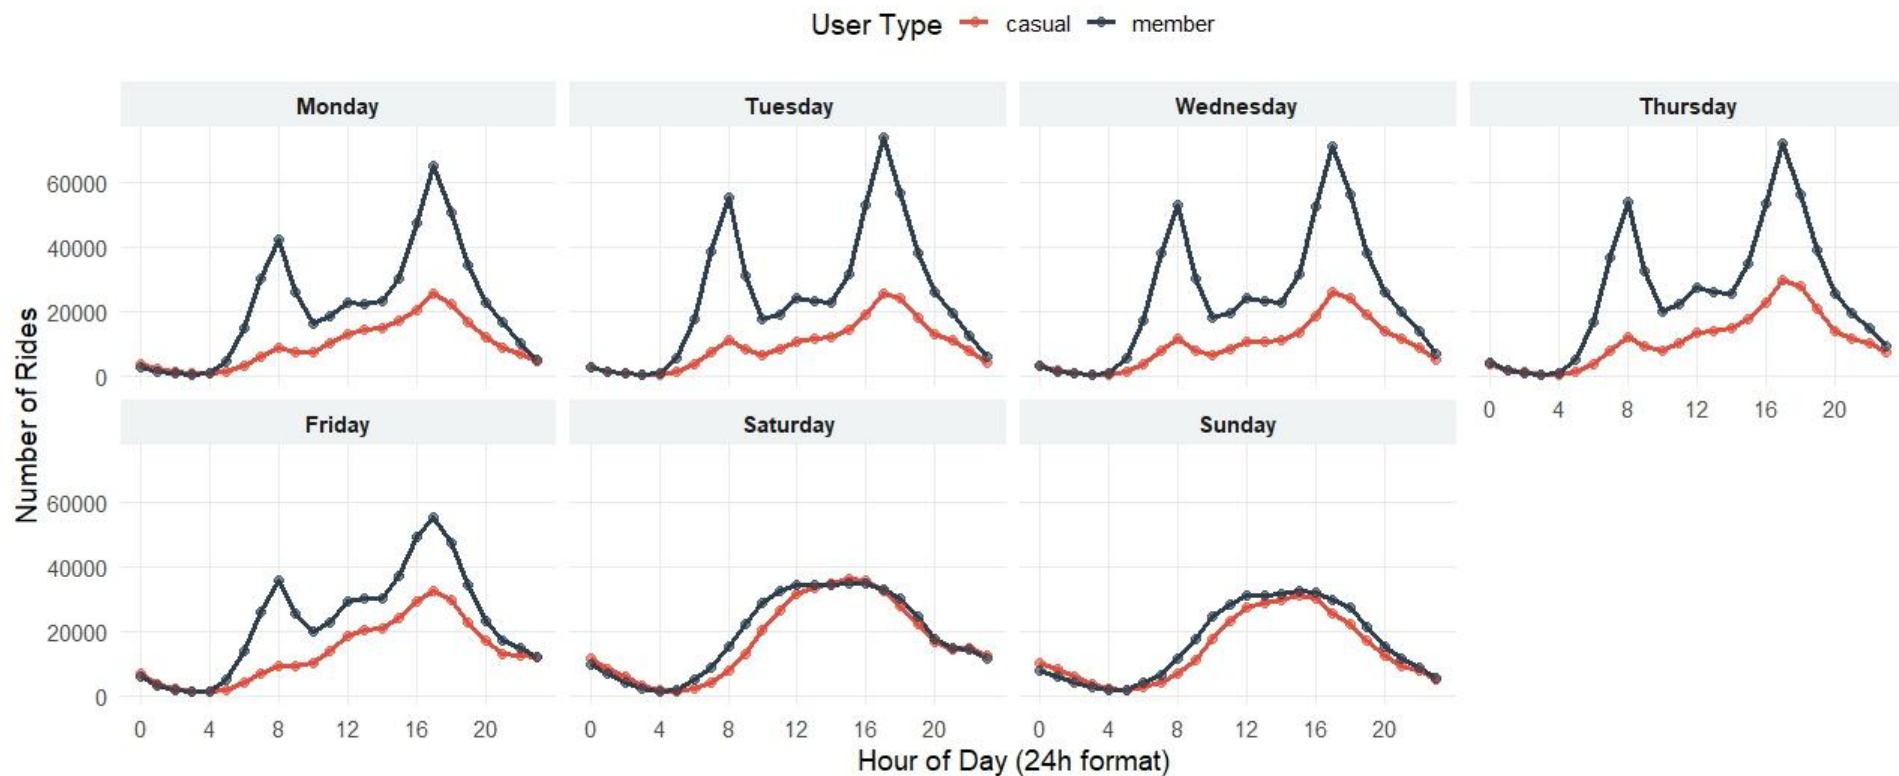

Riding trends among users based on the days of the Week:

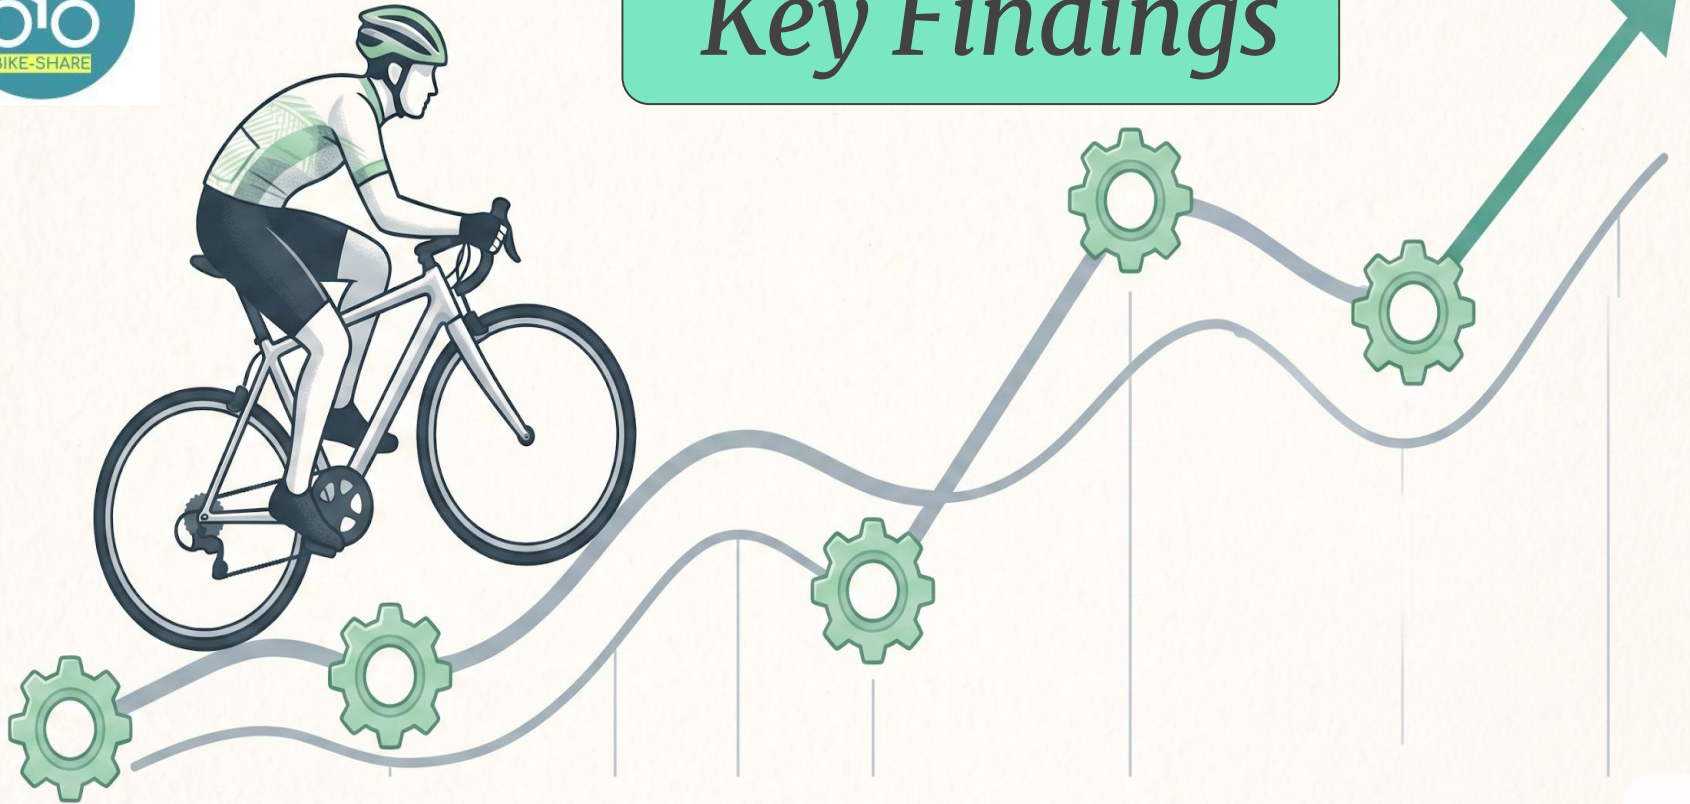

Hourly Bike-Share Usage Patterns

Comparing Members vs. Casual Riders Across the Week

Key Findings

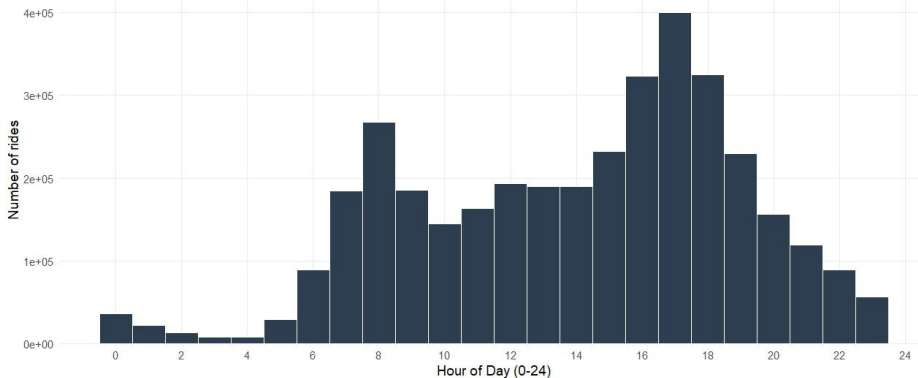

Differences among riding patterns of riders throughout the day: Annual Members VS Casual Riders

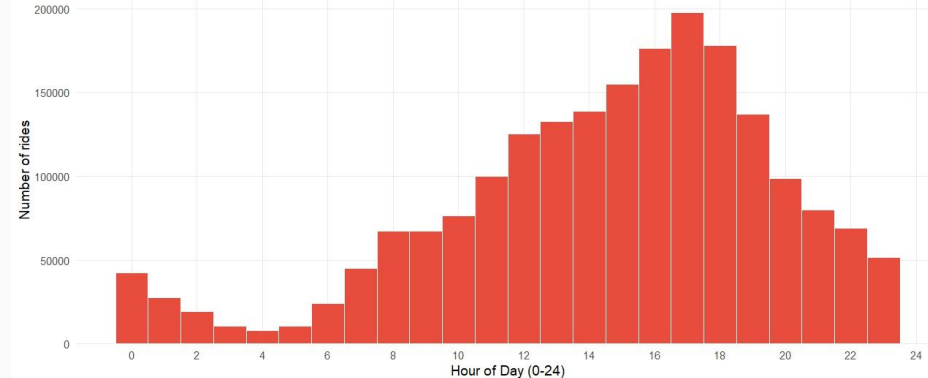

- Casual Riders ride Further distances than the annual members.
- Annual members use the service throughout the day with a peak at office hours.

Casual Riders

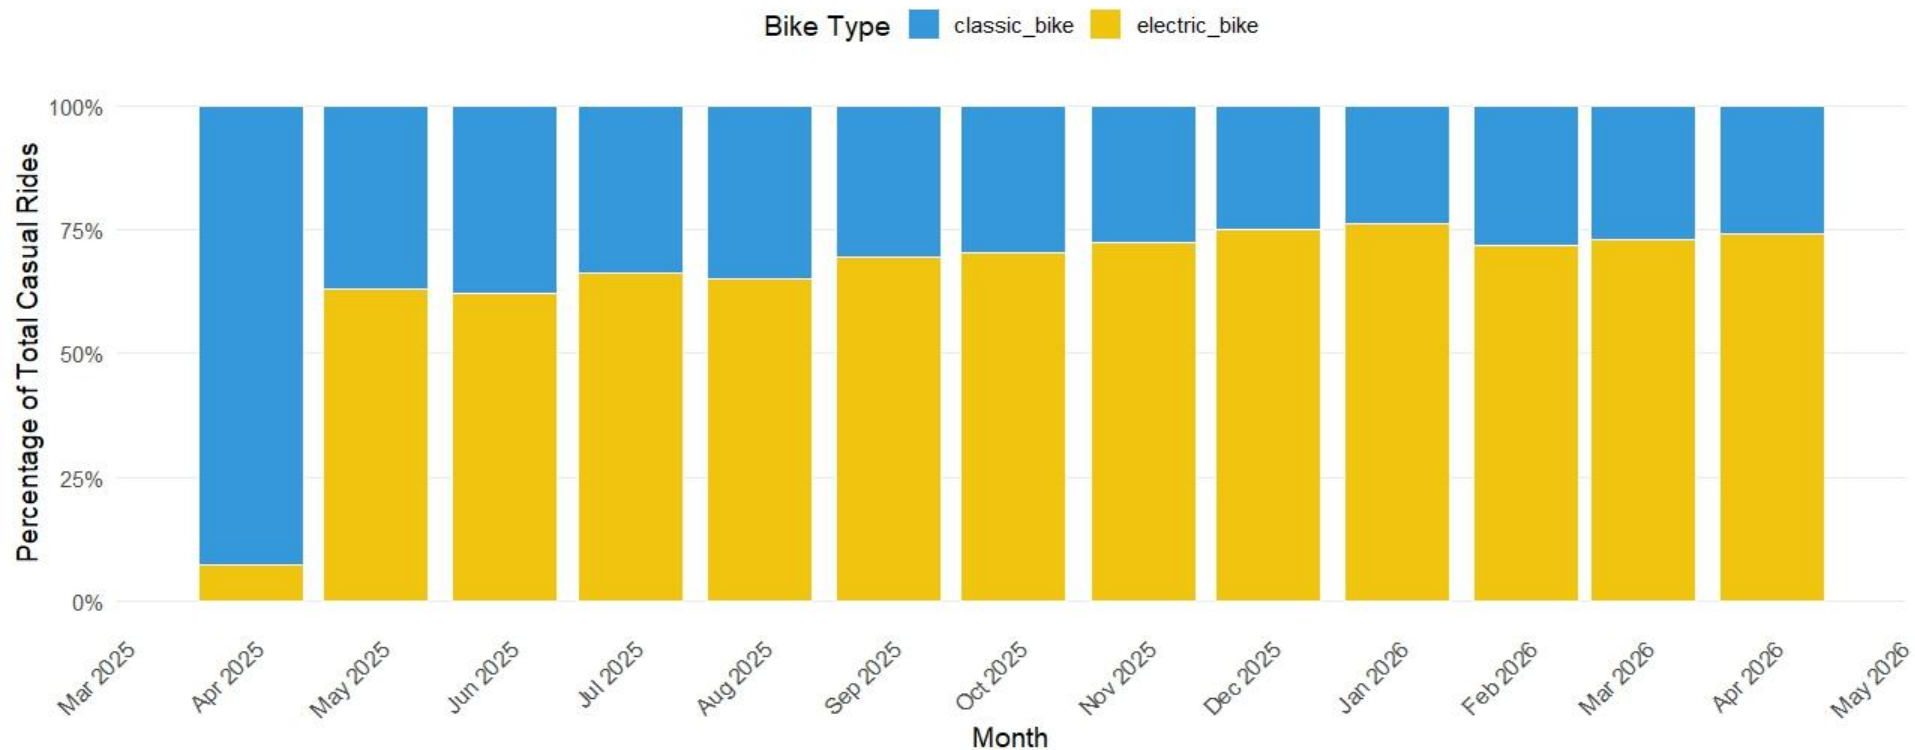

Casual riders' bike preference

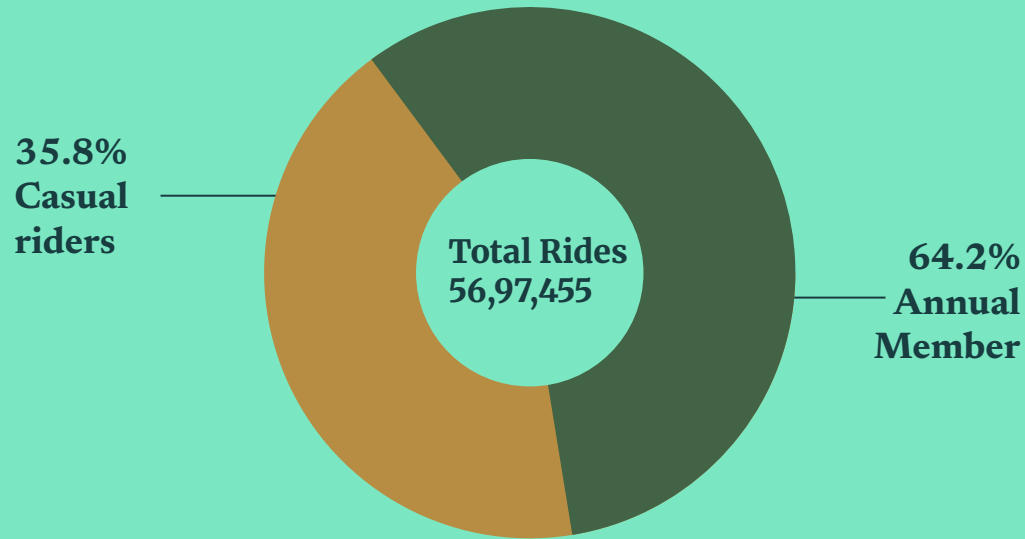

Bike Preferences of Casual Riders Over Time

Monthly percentage breakdown by rideable type

Overall ridership composition

**Docked bikes only
available for casual
riders**

**Most rides took place on the
weekend and during the summer
months**

Classic bikes were picked almost 70% of the time

Recommendations

Step 1

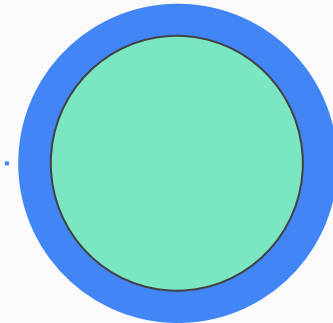

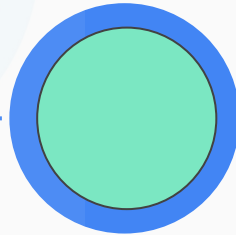

Focus on Summer months' ads campaign since most users connect the app at that time

Step 2

Send personalised ads to casual riders about net savings if they switch to annual plan

Step 3

Including a reward system for the members so that non user also get onboard

Thank you
